

Sofia Carvalho

I'm a software developer with technical skills and a practical approach. In addition to programming, I stand out for being an effective communicator and enjoy helping the team overcome challenges.

Approaching new challenges with enthusiasm, I am ever-ready to learn and evolve. I made a deliberate shift in my career because of my enduring interest in technology. Even during my time in accounting, I relished exploring software to optimize processes. The transition into programming has been a fulfilling journey, where I thrive in finding solutions to various challenges.

I love helping my colleagues. I believe that the success of a project is intrinsically linked to collaboration and mutual support.

I maintain good interpersonal relationships, which are a reflection of the importance I attach to teamwork.

I am ready to bring my experience and attitude to contribute to the team's success.
